Abstract

Multitool – A tool for structured work on multimedia data

Joel Allwood
References

Codine value (CV).

Standardization of TP and CP. It indicates that the TP and the CP are simultaneous.

Discriminatory potential (DP). A discriminant matrix represented by a single point at the origin.

Perception (P). A continuous interval represented by a single point at the end point.

Point of View (PV). A point within the interval corresponding to a moment in the transformation.

This framework can be defined as the distance of the internal and external states.

Appendix

```c
/* Define the function to calculate something */
int calculate(void)
{
    int result;
    result = /* some calculation */;
    return result;
}
```
