Bontouch partners in long term collaborations with clients who are serious about mobile challenges.

2013 we revolutionized mobile banking for businesses, got our first international clients in China and the US, moved into new HQ on Drottninggatan in Stockholm and grew to 21 employees! In 2012 we went to Cuba, launched Eurocard iOS/Android as well as the ingenious app Link, a groundbreaking app to share your notes on patented Swedish innovation Whitelines® Paper. We won the Golden Mobile award with our client SEB in 2011 and for Best Utility App with our client Rebtel in 2010.

A lot in a few years, but we have only just started!

Enhanced Mobile AR

Apple and Google see Augmented Reality as an important field and have invested in terms of APIs and hardware to make AR applications possible. The latest iOS and Android versions introduced several new motion detection features and the iPhone 5S has dedicated hardware for motion sensor integration.

It is relatively easy to implement a basic AR view based on the video stream, GPS-position and the compass. But to take it to the next level and create a truly great experiences, quite difficult problems arise. The goal is to investigate ways to combat these problems, and then improve AR-views we have in Android or iOS.
