

# DreamSpark at IDA

Dreamspark (fd MSDNAA) provides an opportunity for students to download and use on their own computer, several of Microsoft's software products (mainly operating systems and development tools).

All of LiU's students have free access to the Microsoft DreamSpark. If the software that demand is there, it is an easier and faster method.

## Sitemap DreamSpark software

### DreamSpark login for students

DreamSpark Premium is something that IDA Awards to students as time permits and is regarded as a privilege, not a right. IDA pays for this in the first place to get access to the software cheaper to our PC-pul.

***IDA does not provide support for the software in question.***

### Software applications accessible through IDA's agreement

Requirements to be eligible for free download are:

1. Registered on the course given by the IDA or master thesis at IDA or is employed at the IDA (otherwise ordinary DreamSpark, see above).
2. Request sent to **msdnaa@ida.liu.se** with the request for an msdnaa account. Senders should be either student.liu.se address (abcde123@student.liu.se) or Linköping University address (FirstName.LastName @ Linköping University), this also applies to the reply-to address. Account information will be created for FirstName.LastName @ Linköping University or user@student.liu.se, to which the account information is sent from Microsoft.
3. Accounts are not created each day. It may take up to a week during term time, but usually it goes faster.
4. Eventually, an e-mail message from Microsoft with the login information (link to go to, account, and password). As the sender is noreply@e-academy.com. Sometimes it ends up in the spam bin.
5. Please read the rules properly. When you use the account you agree to the rules and that is an agreement between the account holder and Microsoft.
6. Download and install the software according to Microsoft's instructions.
7. Software are added for download after which they are made available by e-academy and Microsoft. So no idea to ask us about certain software-we know as little as you can.
8. If it is software that requires registration with Microsoft, first make sure that the hardware you are installing to work with the software in question, in order to avoid problems of type "The product key you typed is already in use" If you change hardware.

9. Student accounts for the current semester (spring, autumn).
