Abstract

An article may include an abstract of 100 to 150 words. If you use an abstract, its heading should be centered using font Times, 10 bold. If not, remove the abstract section.

1. General instructions

Each submission should be in PDF with up to two pages including references. It should not be shorter than a full page. The submitted PDF files will appear in the collection of abstracts directly as received. Do not print page numbers!.

The language of the abstract should be English or Swedish.

2. Headings

You may use two levels of headings but not three. This is what a level 2 heading looks like:

2.1 Level 2 heading

This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example.

This is just an example. This is just an example.

This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example.

just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example. This is just an example.

3. Figures and tables

Two types of figures and tables are distinguished: in-column and big tables that don't fit in the columns.

Table 1 is an example of an in-column table.

3.1 Big tables

Table 2 is an example of a big table which extends beyond the column and will float in the page.

4. Footnotes

Avoid using footnotes.

5. References in text

All references within the text are placed in parentheses containing the author's surname followed by a comma before the date of publication (Wierzbicka, 1987). If the sentence already includes the author's name, then it is only necessary to put the date in parentheses: Wierzbicka (1987) . When several works are cited, those references are separated with a comma (Wierzbicka, 1987; Artstein and Poesio, 2008; Stymne, 2008) which is displayed as a semicolon. When the reference has more than three authors, only the name of the first author, followed by et al, appears.

Bibliographical references are listed in alphabetical order at the end of the article. The title of the section, "References", will be a level 1 heading. The first line of each bibliographical reference is justified to the left of the column, and the rest of the entry is indented. The following

Measure	Value	Comment
BLEU	20.85	Not as good as we wished!
NIST	5.95	
METEOR	42.62	

Table 2: The caption of the big table

examples illustrate the format for books, articles and conference proceedings.
