

## *Artificial Intelligence Journal:* FUNDING OPPORTUNITIES for PROMOTING AI RESEARCH Deadline for proposals: **May 14, 2010**

### **Background**

Artificial Intelligence Journal (AIJ) is one of the longest established and most respected journals in AI, and since it was founded in 1970, it has published many of the key papers in the field. The operation of the Editorial Board is supported financially through an arrangement with AIJ's publisher, Elsevier. The editorial board of Artificial Intelligence is now in the unique position of being able to make available substantial funds, of the order of US\$250,000 per annum to support the promotion and dissemination of AI research.

### **What are the goals of this funding?**

In providing this funding, AIJ aims to:

- promote and raise awareness of AI research and practice;
- encourage the timely and widespread dissemination of AI research results, techniques, and tools;
- promote interaction and exchange of ideas between AI researchers, practitioners, and students;
- promote the exploitation of AI research results, techniques, and tools.

In this call, a proportion of available funds have been set aside for activities that are fundamentally new, and likely to lead to the establishment of a new research community or new direction for AI research.

### **What kinds of activities will AIJ consider funding?**

Broadly speaking, any activity that achieves the goals described above might be considered as a candidate for funding. For example:

- student travel scholarships for a conference or workshop;
- funds for an invited speaker to present at a conference or workshop;
- funds to support a web site to disseminate proceedings of an AI related conference or workshop;
- start up funds for a workshop in a promising new area of research;
- funding to organise a summer school on some aspect of AI.

This list is absolutely *not* intended to be exhaustive, and we strongly encourage you to consider innovative ways in which the goals set out above can be achieved. See below for the criteria that will be used to evaluate proposals.

### **What kinds of activities does AIJ prefer not to fund?**

Some guidelines:

- *We prefer not to fund individuals.* By preference, requests will come from organisations such as a foundation, charitable body, or the organising committee of an event. AIJ does not exclude the possibility of funding individuals, but this is likely to be exceptional. Note that AIJ will *not* fund individual requests for travel funds.
- *We prefer not to fund research projects.* Research projects involving staffing costs would probably not, in our view, be a cost effective use of the funds.
- *We won't fund duplicate activities.* For example, if there is already an established, successful, and well-regarded conference in the area of *X*, then in all likelihood we would not provide seed funds to set up a duplicate, competitor conference.
- *We prefer not to fund activities where alternative*

*sources of funding are readily available.*

- *Activities are funded on a not-for-private-profit basis.* AIJ will not fund activities that lead directly to profit for the organisation or individuals involved. However, we recognise that with some events, (e.g., large conferences) it is necessary to budget for a surplus; in this case, proposals should describe what will happen to the surplus.

There is no hard and fast rule about how much you can ask for: you should ask for what you need to make your activity successful. However, here are some broad principles; as ever, these are only guidelines. First, if you are applying on behalf of a large (> 80 participants), successful, and scientifically strong conference, then please bear in mind that several such conferences applied for funding for (e.g.) student travel grants and invited speakers in the December 2009 round of AIJ funding, and received typically US\$10K each. Although, as always, there may be exceptions to this, it may be helpful to use this amount as a guideline. Note that we would be reluctant to spend more than US\$50K on an individual activity. Proposals may include the possibility of AIJ underwriting an activity (to an agreed limit) in the event of a loss. Finally, we urge you to investigate whether it is possible to “leverage” AIJ funding, for example by obtaining matched funding from elsewhere. In this case, the value of every dollar spent by AIJ is effectively doubled, which makes for a compelling funding case.

## How can I bid for funds?

A proposal should contain the following sections:

- *What?* Describe exactly what activity funding is requested for. Please note that AIJ funds *specific* activities. For example, “we request funds to support a conference on *X*” is *not* a specific request, while “we request travel funds to bring invited speaker *X* to conference *Y*” *is* a specific request. Provide any contextual information that you think is relevant.
- *How Much?* A (high level) budget that provides details of the use of requested funds, and, where appropriate, describes how the requested amount fits into an overall budget for the activity/event (e.g., in the case of requesting conference travel funds for students, what is the overall conference budget?)
- *Why?* Brief justification for funding; note that priority will be given to activities for which no alternative funds are available.

- *Who?* Describe who will benefit from the proposed activity.
- *When?* Dates of the proposed activity, and date by which funding would be needed.
- *Where?* Location of the proposed activity.
- *Contact details* Name, affiliation, contact details for the responsible party (postal address, email, telephone number, fax), web address of event if available.

Proposals should under no circumstances exceed more than **two** pages in total. Proposals should be submitted in PDF via the EasyChair web review system at the following URL:

<http://tinyurl.com/aijournal2>

## How will proposals be evaluated?

We anticipate issuing calls for proposals approximately two or three times per annum, with **FRIDAY MAY 14, 2010** being the deadline for the current call. Further calls will be issued later – watch the AIJ web site for details (<http://www.aijd.org/>). The AIJ sponsorship committee will assess proposals on the basis of:

- scientific quality of proposed activities;
- likely level of impact on the international AI community;
- cost effectiveness/value for money.

All bidders will be informed by email of the outcome of their proposal as soon as an outcome is known.

We anticipate notification of decisions on this round of funding being sent out no later than **July 15, 2010**.

If a proposal is approved for funding, then please be aware it may take time to transfer funds: if you are bidding for funds to support an event, then we suggest your proposal should be submitted at least 6 months before the event takes place.

Note that where a proposal is felt to have merit but is not fundable in its submitted form, we may return to bidders to discuss possible modifications; where this is felt to be necessary, we will try to do this practicably and expeditiously. A summary of successful proposals will be made publicly available on the AIJ website.

## My proposal was rejected – can I appeal?

The decision of the AIJ sponsorship committee with respect to funding decisions is final. We regret that it will not be possible to enter any correspondence with respect to unsuccessful proposals.
