ELECTRONIC NEWSLETTER ON
REASONING ABOUT ACTIONS AND CHANGE

Issue 00001 Editor: Erik Sandewall 1.1.2000

TODAY

The following text was posted on the main ETAI Junction webpage for the new Millenium, under a picture that was taken from "The Medium is the Massage" by Marshall McLuhan and Quentin Fiore, and which appears to originate from an early edition of the works of Jules Verne.

Welcome to join the ETAI for the XXI century!

At this turn of the century and the millenium we wish to put the ETAI in the context of old and new multimedia technology – a technology that develops much faster than even Jules Verne could imagine.

ETAI stands for the Electronic Transactions on Artificial Intelligence (ETAI), and it is a novel kind of scientific journal and communication medium. In fact, it takes an entirely new perspective on communication between researchers, and more specifically the communication within specialized fields of research. We believe that this communication will take dramatically new forms due to the availability of Internet technology. Please visit the various parts of the ETAI Junction webpage structure to see this new medium for research in actual operation.

The ETAI Junction is the webpage structure supporting this journal. It has links to the journal itself containing the accepted articles, but also to the review discussions that preceded acceptance, as well as to our panel discussions, calendarium, and other services for researchers in the area.

This newsletter is issued whenever there is new news, and is sent by automatic E-mail and without charge to a list of subscribers, in plaintext format. The present postscript issue is a bona fide rendering of the same information in alternative typography. Instruction for contributors and other additional information is found at the following URL:
