

The course

- Focus on artefact, context and service
- Distributed cognition
- Tetris, external and internal representations
- Exploring future situations with external representations
- Desktop walkthrough lecture
- Service prototyping lecture
- Sound lecture

The course

- Seminars:
 - Representations and thinking
 - Hutchins: cockpits
 - Gedenryd: Tetris and design representations
 - Kirsh: how external representations enhance thinking
 - Representations and learning
 - Gilbert: teaching and learning about scientific phenomena
 - Brown et al.: traditional teaching does not consider situated cognition
 - Gerber: psychological experience of using externalisations

The course

- Seminars:
 - Representations and transformation
 - Dalsgaard: tools as instruments of inquiry in design
 - Blomkvist & Segelström: benefits of externalisations in design
 - Woods & Roesler: introducing new external representations changes the situation in which they exist

The course

- Representations:
 - Sound representation
 - Sound prototypes
 - Openness representation
 - Artefact prototype

 - Desktop walkthrough
 - Video

The course

- Representations:
 - Workshop
 - Ongoing
 - Definite

The course

- Methods/techniques
 - Sketching
 - Physical prototyping
 - Sound representations
 - Bodystorming
 - Desktop walkthrough
 - Experience prototyping
