

Report Number	2
Format:	No
Deadline	<ul style="list-style-type: none"> <li>• 03 May 2022 On LISAM</li> <li>• Send to TDDD96 Students</li> </ul>
Reference to Coaching Instructions:	The report which is supposed to be sent in 03 May 2022 in coaching instructions
Reports:	One report per TDDD96 group
Number of Pages:	1 -2 per TDDD96 group

The students of TDDE46 evaluate the products. We want to know four things:

- Were all requirements implemented?
- Were all implemented requirements tested? Can we describe the test results with some measurements, e.g. failure rate, coverage, number of variables per test case?
- Can the implemented software be described with measurements, e.g. LOC, Halstead, CK metrics?
- How were the non-functional requirements evaluated? What were the results? Did the TDDD96 projects reach the goal?

The evaluation can be done by giving the students of TDDE46 access to the artifacts. Alternatively, the students of TDDD96 receive instructions of how to make the evaluation and report the data back. An analysis is done together and the students of TDDE46 write a report of about 1-2 pages.

For TDDD96 things like this go to the result section 5.1 Utvärdering av produkten. The reports from TDDE46 are owned together by the student groups and may be used in the final reports in both courses.
